

PLANETCAST successfully obtains ISO/IEC 27001-201

June 2015, Noida (India): PLANETCAST Communication Limited., a broadcast service provider, today announced that it has obtained the upgraded ISO/IEC 27001:2013 certification, the most recognized, internationally accepted standard for information security management. The company obtained this certification back in year 2012 which follows renewal program; every 3 year certificate is re-issued after reassessment as per standards.

The International Standards Organization (ISO) specifies strict requirements for maintaining and continually improving information security management systems based on the assessment and treatment of information security risks. The certification provides third-party (BSI) verification that ESCL demonstrates world-class standards to protect vital customer data from a wide range of cyber threats and vulnerabilities that can lead to data loss.
